SAMPLING

Containers are provided by Caltest and can be picked up at the laboratory at the address below. The **Coliform Bacteria analysis** **REQUIRES** a sterile container provided by the laboratory. Follow the instructions provided with the sterile container. All other packages require a plastic liter container provided by the laboratory. For all samples, transport sample to laboratory on ice in a cooler, bucket, or plastic bag.

***First Draw:** A minimum 6-hour period during which there is no water use throughout the house must be achieved prior to sampling. Collect the “first draw” after this period of no water use.

STANDARD TURNAROUND TIME

Homeowner's # 1 – Presence/Absence (Qualitative) Total Coliform & E.Coli has a 1-week TAT. A “next business day” rush is available for an additional \$38. Rush P/A's must be received no later than 3pm in order to be setup the same day.

All other analyses have a turnaround time of 2-3 weeks from the date of receipt. Delays in TAT are possible if reanalyses are needed or if there are instrument issues. Reports will be emailed (pdf); hardcopy will be mailed upon written request on the chain of custody. Please email us at info@caltestlabs.com if you have any questions.
